

Securing Student Mobility

Empower students to freely exit and enter your campus with **SAFE SCAN™**

School districts are regularly facing the challenge of providing students with flexibility in where and when learning occurs. More frequently, students are gaining access to off-campus learning experiences during the regular school day. With these opportunities come the challenges school leaders face of providing a safe, accurate, and real-time solution for monitoring student attendance and parent notification.

SAFE SCAN™ works with your existing barcoded student ID cards. It reads information from your Student Information System and provides students with a “Green” (good to go) screen or “Red” (not permitted) screen when their ID card is scanned. Building administrators are able to determine the criteria for the approval (green) and denial (red) screens, including student GPA, parent permission, behavior incidents, Administrative permission or other.

How it Works

Each night, your Student Information System shares specific criteria with SAFE SCAN™. When a student wants to leave your campus early, a student scans their ID card and compares SAFE SCAN™ permissions:

1. Students who meet the criteria established by administration receive a “Green” screen and are permitted to leave the building.
2. If a student doesn't meet the criteria, the student will receive a “Red” screen and an optional explanation for the ineligibility (GPA, Parent Permission, Administrative hold, or other reason).

Can be used for student late arrivals, After-school programs, Media Center visits & more!

SAFE SCAN™ supports students entering the campus after bell times, when returning to campus, or at different locations within the building. For example, if your morning bell rings at 7:35am, a student arriving at 7:38am would scan his ID card, indicate that he is "Arriving", and his parents instantly receive an email that he arrived safely. A database entry is recorded showing the time and door used, and his name is added to the daily report automatically sent to the attendance office each afternoon. Latchkey students and after-school programs can also use Safe Scan to notify parents they have arrived or departed from the building.

Searchable Database

Student movement is recorded in the database where Administrators can search and display student activity by student ID number, name, date, and other.

Getting Started Quickly!

In short, we guide your team to make sure you're up and running quickly and easily. To get started, email us with a list of the buildings and doors that you want students to use. We work with your technology staff to populate the database and users, and to connect the scanners and laptops. If you already have laptops and 2D barcode scanners, you can be up and running as quickly as we have your list of eligible students.

Hosted and affordable

SAFE SCAN™ is a hosted application and cost is priced per month, per scanned door. It works with any modern District-supplied laptop and most USB barcode scanners (we'll help you choose the equipment needed).

Call (303) 532-8940 or email dave@safescansolutions.com to help your students securely exit and enter your campus with **SAFE SCAN™**

How it Works (cont.)

- Parents are instantly notified via email when students arrive or leave the building, including the time and door used, and a database entry is made. Likewise, if the student returns later in the day, their "Arrival" scan notifies their parents and another database entry is made.

- Each afternoon, the attendance office and Principal, and others receive an email summary of student departures and arrivals. These reports can be used to maintain a running log of student campus access.
